

## CONSUMER GUIDE

*for*

### Services, Products, Information and Technologies Towards Sustainability in New Hampshire

#### Introduction and Guidelines

The following consumer guide is intended to support New Hampshire residents move towards more sustainable lifestyles. We will update the guide as needed and hope it grows and grows – as NH grows greener. There is no charge for being listed in this guide, thanks to generous support from the Plymouth Area Renewable Energy Initiative (PAREI).

The information has been presented just as we received it, with the possible exception of services. When services listed were not from the list offered in the inclusion form, we have attempted to interpret. Please let us know if there are any errors.

Self Stated Sun Ratings – Business owners were asked to check off one of the following statements which best reflected their level of familiarity or experience with sustainable practices. Unlike movie ratings, a fewer number of suns do not in anyway reflect poor quality – just a more recent involvement in the pursuit of sustainability. In fact, taking the first step of interest is one of the most important steps of all! Generally, if more than one box was checked, the greater number of suns has been assigned. While only a tiny snapshot, it is intended to give consumer just a sense of expertise.

**Listing in this guide is not an endorsement by NHSEA, its board of directors or its members. Please use all standard Buyer Beware precautions.**

- ☀ I am very interested in learning more about green building or renewable energy and would like opportunities to work with customers to grow my business greener.
- ☀☀ I have attended some sustainability workshops and/or have gained some practical experience and am looking for more
- ☀☀☀ I feel confident in my knowledge of sustainable practices, and have a growing number of satisfied customers.
- ☀☀☀☀ While we serve a wide range of customers, my business has established a strong reputation in the sustainable community for our expertise in the listed services.
- ☀☀☀☀☀ The mission of my business is rooted in the pursuit of sustainability. All of our services or products are considered on the leading edge of sustainable practices and we have demonstrated extensive experience.

Matters of Geography: Most businesses listed are located in New Hampshire. A few ‘outsiders’ have also been included if their service to New England impacts NH or there are no similar companies within NH’s borders. The goal is simply to locate the goods and services we need to achieve sustainability.

Consumer Guide will be updated quarterly.

## CONSUMER GUIDE DIRECTORY BY COMPANY NAME

A+ Energy Services, Inc.  
315 Kent Farm Road  
Hampstead, NH 03841  
Dan Ramage  
329-5953

Dealer/Distributor

Our products SAVE YOU MONEY ON YOUR ENERGY BILLS by reducing drafts and air-leaks around often overlooked “holes” including the attic stairs, the whole house fan, the fire place, the clothes dryer, and the bathroom exhaust fan. By sealing these air leaks, our products reduce cold drafts and heat loss in the winter, as well as air conditioning loss in the summer.

Greensward Group  
 PO Box 111  
 Andover, NH 03216  
 Robert L. Ward  
 735-5440  
[rlward@tds.net](mailto:rlward@tds.net)

Consultant/Land Planning  
 Landscape Architect

Energy conservation services in energy-based site evaluation/selection and site planning as proper site selection and site planning should be where energy conservation starts. If the homebuilder starts the energy conservation

process with the building envelope the project is at a disadvantage and has missed some of the most substantial opportunities to conserve energy.

N/A	Soyfire Candle 1976 White Mountain Hwy North Conway, NH 03860 Kelly or June 356-8969 <a href="mailto:info@soyfirecandle.com">info@soyfirecandle.com</a> <a href="http://www.soyfirecandle.com">www.soyfirecandle.com</a>	Dealer/Distributor
-----	--	--------------------

Regular paraffin candles are petroleum with 11 toxins. 100% soy candles burn soot free, toxin free, support farmers, cost less than the big names and use a renewable resource.

---

***	Steel Elements, Inc 18 Glen Road Gorham, NH 03581 Raymond E. LeTellier 466-2500 <a href="http://www.Steelements.com">www.Steelements.com</a>	Manufacturer
-----	---	--------------

We manufacture framing materials from studs to pre-assembled wall and truss frames. These are made out of light gauge cold formed steel and from 70% recycled materials. An interesting fact which we throw around from time to time is that a 2000 sq ft house uses about 1 acre of timber; the same house would use about 5 recycled cars. All of our material is galvanized to prevent rusting. It assembles as easy as wood, but, most of all it is straight, no knots, insect resistant, fire resistant, studs can be cut to order and reduce site waste and much more. We feel our products fall into the live green philosophy.

Ted Hammond Construction LLC

Builder

1389 NH Route 175

Campton, NH 03223

Ted Hammond

726-4833

[tedham@adelphia.net](mailto:tedham@adelphia.net)

I've been working as a builder in the Campton/Plymouth area for 23 years. Throughout my career I have been interested in energy conservation and building the most efficient homes as possible. I feel that all builders should stress to the highest degree the importance of building green to their customers.
